## COMPANY OVERVIEW

Explera s.r.l. engages in importing, manufacturing, and marketing products in the molecular biology field for research laboratories in Italy and internationally. It offers instrumentations for DNA sequencing; thermal cyclers; ultra-compact thermal cycling products; photo-documentation systems; small equipments, such as shakers and rotators, multi shakers, shakers-incubators and thermo-shakers, centrifuges and vortexes, thermostats, water baths, dry blocks, and magnetic stirres; centrifuges; and biohazard and PCR cabinets. The company also provides reagents, such as custom oligonucleotides, siRNA and miRNA products, diagnostic products, oligonucleotides, cloning and expression products, extraction kits, PCR and RT products, electrophoresis products, DNA arrays, peptide synthesis products, custom polyclonal antibodies, and custom monoclonal antibodies, as well as peptide, protein, and antibody arrays. In addition, it offers plastic products, such as pipettes and tips, and plastic and consumables for PCR. Further, the company provides recombinant protein expression and custom proteomics services. It markets its products through sales and distributions networks in Italy. The company was founded in 2003 and is based in Jesi, Italy. As of August 10, 2009, Explera s.r.l. operates as a subsidiary of Qiagen NV.
